

## RE36 series rotary encoders

**The RE36 is a high-speed rotary magnetic encoder designed for use in harsh environments. The traditional design enables easy integration on existing machines.**

**A magnet is mounted to the shaft within the encoder's body. Rotation of this magnet is sensed by a custom encoder chip within the body, and processed to give the required output format.**

The encoder chip processes the signals received to provide resolutions to 13 bit (8,192 positions per revolution) with high operational speeds. Resolution options include binary and decimal. Output signals are provided in industry standard absolute, incremental or analogue formats.

The compact encoder body is 36 mm in diameter and provides dirt immunity up to IP68.

The RE36 can be used in a wide range of applications including marine, medical, print, converting, industrial automation, metal working and instrumentation.

### 5 V power supply version

**RE36I**- incremental with 80 to 2,048 pulses per revolution (320 to 8,192 counts per revolution with x 4 evaluation)

**RE36S**-synchro serial interface (SSI) and incremental, RS422

### 24 V power supply version

**RE36P**-absolute parallel interface with 512 positions per revolution

**RE36I**-incremental with 80 to 2,048 pulses per revolution (320 to 8,192 counts per revolution with x 4 evaluation)

**RE36V**-linear voltage output in a range of variants

**RE36C**-linear current output in a range of variants

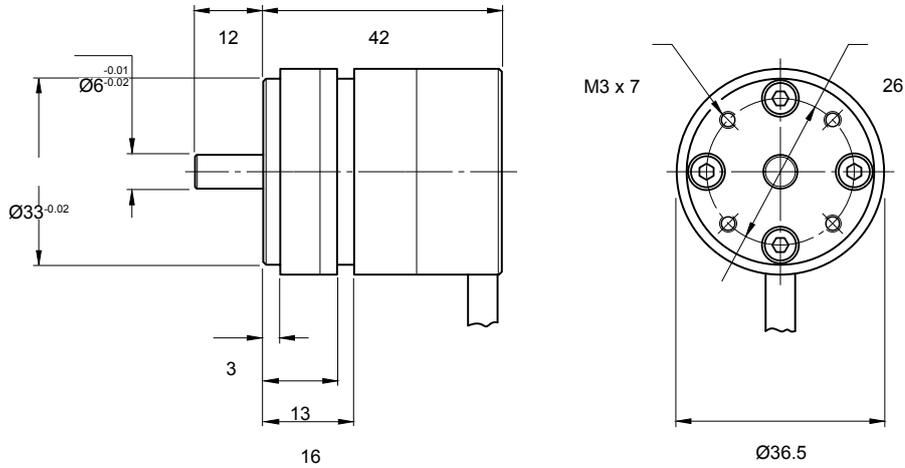

### System features:

- Excellent immunity to IP68
- High speed operation to 20,000 rpm
- 36 mm diameter body
- Industry standard absolute, incremental and linear output formats
- Binary and decimal resolution options
- Accuracy to  $\pm 0.3^\circ$
- Simple integration
- Low inertia

**Shaft size**  
06 - 6 mm

**Special requirements**

- 00 - None
- 0M - Cable length in meters

**Environment**

- A - IP53, Aluminium body (standard)
- B - IP64, Aluminium body
- C - IP68, Aluminium body

**Body style and cable exit**

- 2 - Cylindrical body, radial cable exit

**Connector option**

- A - 'D' type connector - 9 way
- B - 'D' type connector - 15 way (for output types PA and PB only)
- F - Flying lead (no connector)

**Cable length**

- 10 - 1.0 meter (10 meters if 0M is chosen)

**Resolution**

- 09B - 512 counts or positions per revolution

For output types IA, IC, SC and SI:

| Decimal   |            |            | Binary     |            |
|-----------|------------|------------|------------|------------|
| D32 - 320 | D80 - 800  | 2D0 - 2000 | 09B - 512  | 12B - 4096 |
| D40 - 400 | 1D0 - 1000 |            | 10B - 1024 | 13B - 8192 |
| D50 - 500 | 1D6 - 1600 |            | 11B - 2048 |            |

**NOTE:** Not all combinations are valid.
